SUMMARY

Computer Science student and Full Stack Developer with hands-on experience building scalable web applications using React, Node.js, Express, and MongoDB. Skilled in JavaScript and RESTful API development, with a strong foundation in modern web architecture and problem-solving.

EDUCATION

Uka Tarsadia University

Jul-2023 – Expected July-2027

B.Tech in Computer Science and Engineering

CGPA : 8.55 | SCGPA : 8.54

PROJECTS

[Crusty Corner – Pizza Ordering App](#)

[GitHub](#)

Tech Stack: React, Redux Toolkit, React Router, Vite, TailwindCSS

- Developed a responsive pizza ordering web app using React with Vite, featuring menu browsing, cart management, and order placement
- Implemented global state management using Redux Toolkit to handle cart, user, and order data efficiently
- Built multi-page navigation with React Router and reusable UI components styled with TailwindCSS
- Structured the project using modular feature-based architecture for scalability and maintainability

[GrandStay Suite](#)

[GitHub](#)

Tech Stack: React, Supabase, Context API, React Router, JavaScript

- Developed a full-stack hotel management application with secure authentication and backend integration using Supabase
- Implemented complete booking workflows (CRUD, check-in/out) with real-time data handling
- Built a dashboard for analytics including revenue and booking insights with dynamic filtering
- Structured scalable architecture with reusable components and efficient state management

[StayHaven-Full-Stack Travel Listing Web Application](#)

[GitHub](#)

Tech Stack : Node.js, Express, MongoDB, Mongoose, EJS, Passport.js

- Developed a full-stack Airbnb-inspired travel listing platform with complete CRUD functionality
- Implemented secure user authentication and session management using Passport.js, protecting routes from unauthorized access
- Built property listing and review systems with nested MongoDB schemas, supporting image uploads via Multer and Cloudinary
- Designed modular RESTful APIs using Express Router and deployed the application on Render

SKILLS

- **Language** : JavaScript, C++, SQL, C
- **Frontend** : HTML5, CSS3, React, Tailwind, Redux ToolKit, React Router
- **Backend** : Node.js, Express, REST APIs, JWT
- **Database** : MongoDB, Supabase, MySQL
- **Tools & Platforms** : VS Code, Git, GitHub, Postman, Vercel, Vite, Netlify, Render
